# KNF-7 | 5 Survival Water Filtration Hacks

## Stay Sealed, Stay Clever

### Multi-Layer Filter:

Grab a paint can or fuel drum. Line with cloth, stack big rocks, gravel, sand, then crushed charcoal (not greasy grill stuff). Pour sludge slow, catch clean below. Boil or UV it after.

### Boiling Basics;

Fire and time are your allies. Boil caught water hard—kills the nasty. No shortcuts.

### SODIS Sun Trick:

Clear bottle, six-plus hours in direct sunlight. Germs die, but don't trust the shimmer—boil if you can.

### Iodine Boost:

Drop iodine tablets or drops in filtered water. Small, potent, guard it like ammo.

### Solar Still Hack:

Dig a hole, set a tarp or lid, let evaporation catch clean drops. Slow, but pure.

KNF-7 | Grit don't filter water—knowledge does.

# KNF-7 | POST-FILTRATION PROTOCOL

**Stay Sealed, Stay Clever**

**Build the Stack:**

**Layer cloth, rocks, gravel, sand, charcoal in your container.  
Pour runoff slow—catch it clean.**

**Boil It Hard:**

**Hit it with fire. No boil, no trust. Time's your shield.**

**Sun It Down:**

**Bottle in sunlight, six hours minimum. SODIS kills bugs, but  
boil if the shimmer's off.**

**Add Purity Hits:**

**Toss in shungite stones, a pinch of bentonite clay, or  
activated charcoal. Stir, let settle.**

**Guard Your Gear:**

**Protect iodine, filters, or still parts like they're your last  
bullet.**

**KNF-7 | Clean water doesn't bite back.**

# KNF-7 | SCROUNGE YOUR FILTER KIT

## Stay Sealed, Stay Clever Body

### Materials List:

**Container (paint can, bucket, half fuel drum)**

**Cloth or canvas (scraps)**

**Big rocks (handful)**

**Gravel (cupful)**

**Sand (cupful)**

**Crushed charcoal (not grill bricks, handful)**

**Clear bottle (for SODIS)**

**Iodine tablets/drops (few)**

**Tarp or lid (for still)**

### Prep Instructions:

**Filter Stack:** Line container with cloth, layer rocks, gravel, sand, charcoal. Keep dry till use.

**SODIS Ready:** Clean bottle, store in shade, use when sun's high.

**Still Setup:** Fold tarp or lid, pair with a digger tool.

**Boosters:** Bag shungite, bentonite, charcoal separate—add post-filter.

**Storage:** Seal all in a waterproof sack. Stash near your water source.

**KNF-7 | Ready for the runoff before it hits.**

# KNF-7 | FILTRATION RULES OF THE WASTELAND

## Stay Sealed, Stay Clever

### DO:

Pour water slow through your stack—rush it, lose it.  
Boil every drop if fire's an option—germs don't care.

Sun-bottle six hours—SODIS works, but verify.

Guard iodine or filters—treat them like gold.

Add shungite or clay—binds toxins, saves lives.

### DON'T:

Trust the shimmer—boil or you're dead.

Wet charcoal early—ruins the filter.

Skip the stack—sludge kills faster than thirst.

Overuse iodine—taste turns to poison.

Drink unfiltered runoff—grit's a death sentence.

# KNF-7 | WATER LOG

# Date

A circular red stamp is centered on the page. The stamp features a stylized microphone in the center, with a dotted pattern on its grille. Around the microphone, the words "BUNKER BROADCAST SERVICE" are written in a circular, slightly irregular font. At the bottom of the stamp, the number "44" is positioned above the letters "ST". The stamp is set against a light beige background with a faint grid pattern.
